

Hiroshima University (National) **Graduate School of Humanities and Social Sciences**

◆ Program name

Division of Humanities and Social Sciences,
International Economic Development Program

◆ Degrees:

- a. Master of Economics
- b. Master of Business Administration
- c. Master of International Cooperation Studies
- d. Master of Philosophy

◆ Credit and years needed for graduation:

30 credits, 2 years

◆ Address:

1-5-1 Kagamiyama, Higashi-Hiroshima-shi, Hiroshima,
739-8529, Japan

Features of University <http://www.hiroshima-u.ac.jp/index.html>

Hiroshima University (HU) was established by combining eight existing institutions in May 1949 under the National School Establishment Law. Later in 1953, the Hiroshima Prefectural Medical College was also added to the new HU. Some of these higher educational institutions already had brilliant traditions and histories of their own. Although these educational institutions suffered a great deal of damage due to the atomic bomb which was dropped on Hiroshima on August 6, 1945, they were reconstructed and combined to become the new HU. In addition, Graduate Schools were established in 1953. The new HU has risen from the ruins of war like a phoenix, which is in fact the University's symbol.

HU has a long history of accepting international students. This commenced before World War II. As of May 2021, HU has over 15,000 students including approximately 1,700 international students from about different 72 countries.

Features of Graduate School <https://www.hiroshima-u.ac.jp/en/gshs>

In the education and research area of humanities and social sciences which is socially required to be re-considered, it is required not only to promote knowledge of exploration studies that have been traditionally conducted in various fields but also to create new social values and methods for solving problems in a rapidly-changing society. To address such a requirement, this graduate school integrates faculties who are engaged in education and research in various graduate schools into one graduate school to establish an education and research organization in which the wall between fields is eliminated. This organization aims to develop human resources who are capable of sharing values with specialists of other fields and being engaged in cooperation for realizing such values by cultivating interest for other fields than their specialties in addition to the existing academic field. To conduct the education and research to achieve the aim described above, this graduate school introduces the degree program system that specifically indicates the image of human resources to be developed, diploma policy, and curriculum policy for the students who want to earn a degree and clearly describes the purpose and method of cooperation with the education course within and outside of the major course. It is expected that students will be allowed to expand their vision and develop their will and capability for communicating with each other beyond the differences in their specialty fields and nationality while studying in the same place as students of various fields that are not limited within the framework of the existing graduate school, students of various degree programs with different characteristics, and foreign and Japanese students who are engaged different issues and have different cultural and religious backgrounds. In response to the introduction of the degree program system, the name of the degree program is indicated in the diploma certification in addition to the major course name and the name of the specialty field to allow students to easily explain their specialties.

I. Key Features of Education

(1) Education Programs in English

We believe it is important to develop international professionals capable of writing academic articles and reports,

communicating and conversing in English. Therefore, almost all lectures and seminars are provided in English.

(2) Systematic and Interdisciplinary Curriculum

We offers a systematic and interdisciplinary curriculum to produce specialists who can contribute to international development and cooperation in ways that cut across established academic disciplines. We offers integrated education and research programs in economic development, international affairs, cultural dynamics, engineering, biology, peace studies, educational development, regional studies, Asian cultures and interdisciplinary programs to develop global perspectives.

II. Special Education Programs

We offers special education programs designed to improve the qualifications and skills of students who plan to work in the field of international cooperation. The main features of these programs are as follows.

(1) Global Environmental Leaders Special Education Program

One of our aims is to establish a center for training environmental leaders capable of identifying problems and formulating strategic solutions at national or local levels through interdisciplinary and international perspectives. The global issue of reducing carbon emissions is an example of such a problem and the need for solutions. Another aim is to provide a platform for collaboration between industry, government and academia to promote cutting-edge environmental research and create coherent practical solutions for environmental issues on a global scale that is not limited to developing countries. We seek to provide value-added knowledge to those engaged in international cooperation. Achieving these aims requires addressing five areas: urban system design to prevent global warming, wise use of biomass resources, environmental impact assessment, policy and institutional design and environmental education. Our intention is for developing countries to work hand in hand with Japan to develop international environmental leaders, a task that we will undertake in an effective and practical manner.

For more details, go to

https://www.hiroshima-u.ac.jp/en/idec/education/special_education/courses/gels

(2) Formation of a Strategic Center for Global Internship (G.ecbo)

HU is currently promoting the “Formation of a Strategic Center for Global Internship” (commonly known as the “G.ecbo program”) following the 2007 adoption of the Support Program for Improvement of Graduate School Education. G.ecbo is a practical education program that includes pre- and post-internship training designed to achieve viable outcomes from student internships. The following types of internships are available:

- (1) overseas internships, in which students go to a university or organization outside Japan;
- (2) domestic internships, in which foreign students go to a Japanese company or organization;
- (3) third-country internships, in which students from developing countries go to institutions in other developing countries.
- (4) follow-up research internships, in which students in doctoral programs go back to countries where they have previously worked.

Features of the Program

<https://www.hiroshima-u.ac.jp/en/gshs/program/humanitiesandsocialsciences/InternationalEconomicDevelopmentP>

The International Economic Development Program fosters advanced professionals and researchers who can contribute creatively and collaboratively to development policy planning, implementations, evaluations and improvements towards promotion of sustainable development goals, through acquisition of global perspectives, and knowledge and skills necessary in evidence-based interdisciplinary social science.

The art and science of policy making is entering into a new era. The paradigm shift is upgrading the process of policy making and its impact evaluation from a personal-experience-based subjective approach to a more objective, evidence-based one.

Evidence-based decision making does not merely mean the utilization of data; rather, it explicitly prohibits doing so, by acknowledging the wisdom that what our data shows in front of our eyes is just the correlation, and not the causation that we need to base our decision. The fact that “people with higher education enjoy higher income” does not imply “promoting higher education promotes income growth.” The fact that “countries with higher child birth rates face higher poverty” does not imply “suppressing child birth reduces poverty.” The fact that “cities with better sewage have better child health” does not imply “better sewage improves child health.”

If we want to know the impact of the policy to tackle these problems, we must find the truth hidden behind the observed data. The art of science of finding the truth in this way is the evidence-based decision making that we

offer.

In order to tackle various development issues such as economic development, environmental conservation, poverty alleviation, and urban/rural dynamics, The International Economic Development Program provides the systematic curriculum to cultivate abilities for identifying/targeting issues, applied analysis, policy proposals that can link advanced social science methods to practical problem solving. Additionally, this program offers learning and training opportunities to develop professional communication skills to work with diverse stakeholders and leadership in problem solving.

Necessary Curriculum to Obtain the Degrees

To obtain a Master's degree, JDS Fellows need to satisfy the following requirements:

Minimum of 30 credits through program work;

Submission of a master's thesis.

All students need to decide research topic and supervisors (one head-supervisor and two sub-supervisors) at the beginning of the first semester. Under the head-supervisor's advice, students will choose subjects to enroll and start preparations for a master's thesis.

List of subjects offered in 2021 academic year is attached. Students will choose subjects mainly from "International Development Economic Program".

Associate Professor	JOSHI , Niraj Prakash	Climate change, agricultural technology adoption, agriculture production economics, poverty and rural development in developing country

Academic Schedule

(Reference)

Fall Semester (October 1 - March 31) <In case of the schedule in AY2020>

October 1	Entrance Ceremony, Orientation
October 2 - February 8	Classes
Early October	International Student Orientation (University-wide)
Mid October	Deadline of Class Registration
November 5	University Anniversary Day
December 26 - January 5	Winter Vacation
February 9 - March 31	End-of- Academic-Year Holidays

Spring Semester (April 1 - September 30) <In case of the schedule in AY2021>

April 1 - April 7	Spring Vacation
April 8 - August 5	Classes
Mid April	Deadline of Class Registration
End of July	Thesis Submission
Mid-August	Thesis Defense
August 6 - September 30	Summer Vacation
September 17	Graduation Ceremony

Facilities <https://www.hiroshima-u.ac.jp/en/centers>

Residence

We provide apartments for international students at a reasonable rent. Students can get support in English from Hiroshima University Co-op when they apply for the apartments, have trouble and so on.

Also, a public apartment called "Sun Square Higashi-Hiroshima" is available to international students.

Library

Our library has nearly a collection of 30,000 titles of books and journals. Our collection is mainly focused on

economics of development, education development, international relations and Asia regional culture development. "World Bank Information Kiosk" is placed for the purpose of introducing active discussions in academic area about the policy and actions of the World Bank. Students can access to "World Development Indicators Online" in our library. Flag ship publications, project reports, brochures and publications from the World Bank Tokyo Office are also available.

JDS fellows have full access to 5 other libraries on campus which has approximately 3,300,000 materials in its collection. Holding a huge collection of books and electronic journals, with a total combined area of 29,000 square meters, Hiroshima University Library System comprised of 5 libraries is one of the largest in the country.

Other facilities

Within the campus, we have welfare facilities such as various cafeteria, a travel agency office, stores, book shops and a barber shop. Hiroshima University also has a post office, a university health service center, and a dental clinic in the campus. The International Center provides mental counseling service to international students in English.

Message for Applicants

The International Economic Development Program started accepting JDS Fellows in 2002 and currently we have JDS Fellows from 13 countries (Ghana, Cambodia, the Kyrgyz Republic, Sri Lanka, Tajikistan, Nepal, Pakistan, Bangladesh, the Philippines, Vietnam, Myanmar, Mongolia, and Laos). We also have students dispatched from governments mainly in Asian countries, under MEXT, Japanese government, the World Bank, and other scholarships. During lectures, seminars, or in student research rooms, students are actively participating in the discussion, exchanging their views and stimulating one another.

HU is a research based university. In line with this policy, We requires a thesis for the fulfillment of the master's degree, which is different from the coursework-based curriculum typically found in professional schools. It is not a very easy task to compile a master's thesis based on independent research. In fact, students need to spend significant time and resources. However, it is expected that this experience will enable you to acquire specialized academic and practical knowledge in your area of specialization. To ensure that you can pursue research of a high standard that achieves a good result, at the time of joining our program we require applicants to have a good command of English. Some knowledge of economics is also highly desirable.

In the campus surrounded by abundant nature in the suburbs of Hiroshima city, you can give your full attention to your study. Your each and every experience here will serve as an excellent base for your further steps as a professional government official. We welcome you to Hiroshima University.

【Voice from JDS Return Fellows】

Mr. Huq Muhammad Tashfiq, 15 Batch (2016-2018)

Belonging Organization: Bangladesh Bank

Studying in Hiroshima University is one of the most pleasant experience I ever had. I have started my masters in Development Policy from October 2016 and continuing till present.

Hiroshima University is situated in a beautiful place, far from city life. The environment is ideal for study. I was very surprised to know about the diversity of study subjects. Before coming to Hiroshima I was afraid about studying. But after coming here I have learnt about so many disciplines other than my basic subject economics. The course

was really a multidisciplinary course. Anyone even from a totally different background like me can cope with the study. The professors are very helpful. I have also attended some conferences which enriched my knowledge about research.

In Hiroshima University cafeteria we can taste different Japanese style food. There is provision for halal food for Muslims in the cafeteria. I have attended some of the cultural programs arranged by the university. I came to learn about cultures of different countries and Japan from these events. Also we can show others about our culture through the events. I was really enjoying my life in Hiroshima University.
