

Sub-Program	1. Enhancement of Policy Making Capacity for Industrial Development
Component (CP)	1-3. Infrastructure Development for Sustainable Economic Growth
Accepting University (Number of accepting scholars)	<p>Nagoya University (2) GS of Environmental Studies, Nagoya University Global Environmental Leaders Program - Degree: Master of Environmental Studies or Master of Engineering</p> <p>Notes in application</p> <ul style="list-style-type: none"> - <u>If applicants do not fulfill a regular period of school education (16 years from primary school to university), the eligibility will be assessed.</u> - More than TOEFL iBT 80, CBT 213 or PBT 550 or equivalent is preferable (<u>not required</u>).
Target Group of Civil Servants	<ul style="list-style-type: none"> ■ Position Category: Professional and Management (PMC) Category ● Super Structure: Technical Service ● Major Occupational Group (MOG): Architectural, Engineering and Land Services Group ● Sub Group: Engineering Services <ul style="list-style-type: none"> Farm Mechanization Services Geology and Mines Services Heritage, Sites, Conservation Services Meteorology/Hydrology Services Urban Development Control Services
Background of CP	<p>Though Bhutan depends on roads as its means of transportation, the road network has not been fully developed. The main road network consists of only five national highways: National Highway No. 1, running in the country from east to west, and National Highways No. 2–No. 5, running down south to the border of India. As of 2005, over 20% of the total households had to walk for more than a half day and approximately 10% had to walk for six hours at least to reach trunk roads. As of 2012, 31 out of 205 counties do not have vehicle accessible roads. The government of Bhutan has been working on extension and renovation of the road network and maintenance, repair, and replacement of bridges. But an absolute shortage and poor maintenance of roads makes it difficult for residents to access various social services and markets as well as to conduct economic activities, including shipping of agricultural products to the market in a timely manner. This is a major factor that is hindering the development of Bhutan.</p>
