Direction of Study (Background of CP)	<p>In the "Rectangular Strategy" set by the Cambodian government, good governance stands as the basis of all other developments. With such situation, the government of Cambodia promotes reform in the field of anti-corruption, legislation and judicial reform, public finance administration reform, and administrative reform (including decentralization of power and services). However, Cambodia lacks human resources who plan and operate law, policies and institution. This remains as a big wall and risk for the development and establishment of all reformations.</p> <p>With this situation, it is necessary to foster human resources who have basic knowledge about the public-policy research on demarcation of central and local government roles which normally requires long research period, finance and human resources management of local government, the statistical analysis in social economy, policy making to narrow the development gap.</p>
