

<b>Sub-program (Target Priority Area)</b>	1. Improvement of Economic Infrastructure
<b>Component (CP) (Development Issues)</b>	<b>1-3. Enhancement of Industrial Promotion, Investment Climate and Trade</b>
<b>Expected Research Areas</b>	Promotion Policy for manufacturing industry, Economic Policy Design and System Construction of Investment/Export Promotion * <a href="#">Take the following "Direction of Study (Background of Component)" into account before making your research plan.</a>
<b>Accepting University</b>	<p><b><u>International University of Japan</u></b> (Acceptable number of seat: 2)  <b>GS of International Relations</b>  (1) <u>International Development Program (IDP)</u>  <b>&lt;Available degree (s)&gt;</b>  Master of Arts in International Development or Master of Arts in Economics  <a href="#">If applicants do not fulfill a regular period of school education (16 years from primary school to university), the eligibility will be assessed.</a></p> <p><b><u>International Christian University</u></b> (Acceptable number of seat: 2)  <b>GS of Arts and Sciences</b>  (1) <u>Public Policy and Social Research Program</u>  <b>&lt;Available degree&gt;</b>  Master of Arts in Public Economics  <a href="#">If applicants do not fulfill a regular period of school education (16 years from primary school to university), the eligibility will be assessed.</a></p>
<b>Target Officers</b>	All CSS/Cadre officers and Federal Ex-Cadre officers (BPS17 and above)
<b>Target Organizations</b>	All Government Organizations (except Corporate Body)
<b>Direction of Study (Background of CP)</b>	<p>Under the long-term development plan "Vision 2025," Pakistan aims to improve productivity based on stable long-term macroeconomics and achieve an economic growth of 7% or more through stabilization of macro economy and reformation of the electric power sector and state enterprises. Currently, manufacturing accounts for only a small portion of GDP, and diversification and high value addition to industries have not been moved ahead. Though Pakistan has traditionally had strength in fabric and food processing industries, these industries are losing export competitiveness in the global market as they cannot break away from low quality and low value-added products because of a shortage of investment, human resources with good skills, etc.</p> <p>Under the country assistance policy for the Islamic Republic of Pakistan, the government of Japan aims to provide assistance that contributes to poverty reduction and productivity improvement of the agricultural sector which accounts for a large portion of the working population as well as assistance that contributes to strengthening the industrial sector, including increasing competitiveness of the manufacturing industries, promoting export, and improving the investment climate. This component serves for a part of it. Up until now, Japan has implemented the programs for industrial development and investment climate improvement to support Pakistan's multiple sectors for developing local manufacturing industry, improving the investment climate, promoting trade, etc., primarily targeting the automobile industry which has high added value and employment creation effect.</p> <p>JDS is expected to contribute to capacity development of administrative officials in charge of policies for promoting manufacturing industry and developing economic policies and systems in the investment and export promotion.</p>
